

ABOUT THE SPEAKER

Dr. Vijayendran Govindasamy is a prominent researcher in the field of stem cells and regenerative medicine in Malaysia, with a successful track record of over 15 years. He obtained his PhD in molecular biology from the University Malaysia Terengganu, where he was recognized for his outstanding research work. He has since held various research, management, and leadership roles, gaining valuable experience in the field.

Currently, Dr. Vijay leads the R&D Department at CryoCord Malaysia, which is the largest stem cell storage and therapeutic company in Malaysia and Southeast Asia. His work is focused on advancing the understanding and application of stem cells and regenerative medicine. Dr. Vijay has conducted extensive research on human cell and tissue culture, genetically engineered cells, immunology, and extracellular vesicles. His research has been widely recognized and published in over 50 papers, many of which are in high-impact international journals.
